^ Denotes less than 1%.

*ASPS members were not asked to track these procedures.

⁺ Male-pattern baldness was asked only of members and does not include female patients.

Note: Retin-A[®] treatments total 3.8 million. 25% of all Retin-A patients were 18 or younger; 21% were 19-34; 25% 35-50; 19% 51-64; 10% 65 and older. (not included above)

Note: Age breakdowns for breast implant removal are not included.

Following are further age breakdowns for ear surgery:

6 or < 10,550

7-12 9,105

13-18 3,345

35-50 year old total represents all patients 35 and older.

Some procedures commonly considered cosmetic might actually be reconstructive and subject to insurance reimbursement depending on the patient's condition.

All figures are projected. Figures and percentages may not add to 100% due to rounding.

ASPS Procedural Statistics represent procedures performed by ASPS member plastic surgeons certified by the American Board of Plastic Surgery as well as other physicians certified by American Board of Medical Specialties-recognized boards. See Methodology and Information for further details. © ASPS, 2001
