All figures are projected. Figures and percentages may not add to 100% due to rounding.

\* ASPS members were not asked to report procedural data in 2000.

\*\* Insufficient sample size to accurately project 2000 procedures.

+ Further age breakdowns for ear surgery: 6 or younger = 15,842; 7-12 = 9,304; 13-18 = 3,919.

^ Denotes less than 1% of all patients.

Some procedures commonly considered cosmetic might actually be reconstructive and subject to insurance reimbursement depending on the patient's condition.
